

Foundations for OASIS Competency

This is a Training You Can't Afford to Miss!

There is something big in home care, and it's called OASIS-C. As you well know, it includes some of the biggest change to OASIS in over a decade. Ongoing training for it is essential. After you've had time to use the new tool, questions will surely arise. Are you prepared?

The Georgia Association for Home Health Agencies, Inc. is excited to bring you one of the most intensive How-To-Do-It OASIS-C trainings available. These trainings are designed specifically to help you improve your OASIS-C accuracy. Now that you've had practice using the tool, we can talk about what works, what doesn't, and where we are finding common mistakes. As an attendee you'll receive all the must know information on the most important changes to the current assessment – and how to respond to each of these changes. This includes best practice strategies for responding to process of care measures, conventions for completing the most important revised assessment items, and a review of screening questions that will have a dramatic impact on clinical practices.

Presented by a National Leader in OASIS

This is a training designed by clinicians for clinicians. The content is delivered by OASIS expert Rhonda Will, RN, BS, COS-C, HCS-D, who uses her expertise who connect the data items to the essentials of home care practice: assessment, care planning, care coordination and communication. As a participant you will walk away with current, relevant information and be able to select responses to OASIS data items that accurately describe the patient's health status and provider care practices in accordance with Medicare regulation, CMS guidance documents and other applicable industry standards after conducting a patient multisystem assessment.

OASIS impacts everything – quality scores, case mix weight, reimbursement, and ultimately the financial and quality viability of your agency. If there is one message, it is this: You can't afford to miss this training.

Training Objectives

- Discuss the clinical, quality and fiscal significance of the new OASIS data items.
- Learn effective tools for responding to the OASIS-C process-measures such as depression screening and pressure ulcers, including what's worked and what has not.
- Identify the essential components of multisystem and functional activity assessments and reporting requirements.
- Get best practice strategies for answering the OASIS-C clinical, functional and wound items.

* Sleeping room accommodations are available at the Marriott Macon Center at a special GAHHA meeting rate of \$105 single/double. Please call the Marriott at 478-621-5300 for reservations and be sure to mention the Georgia Association for Home Health Agencies to receive this special rate. Sleeping room cutoff date is January 24, 2010, but we suggest making your hotel reservations ASAP to secure a room at the special rate.
